EDUCATION

Course	College / University	Year	CGPA / %
B.Tech (CSE(MAC))	Netaji Subhas University of Technology	2023-2027	6.32
Board (Class XII)	Government Co-Ed Sarvodaya Vidyalaya	2022	69
Board (Class X)	Indraprastha Convent Senior Secondary School	2020	74

INTERNSHIP

Machine Learning Intern | Suvidha Foundation

Jun 2026 – Jul 2026

- Performed data preprocessing, feature engineering, and machine learning model development using Python, Pandas, NumPy, and Scikit-learn to solve real-world predictive analytics problems.
- Built reusable data preprocessing pipelines, optimized model performance through feature selection and hyperparameter tuning, and visualized insights using Matplotlib and Seaborn.

Frontend Developer Intern | HumbleServers | [Certificate](#)

Dec 2025 – Jan 2026

- Developed responsive dashboards and client panels using modern frontend technologies while implementing new features, fixing production issues, and improving overall user experience.
- Managed Pterodactyl Panel deployment, integrated WHMCS billing automation, and optimized Linux server configurations to improve application reliability, security, and system performance.

PROJECT

Business Intelligence Platform – Enterprise AI Analytics System

[GitHub](#) | [Live Demo](#)

Tech Stack: Python, FastAPI, React, PostgreSQL, MLflow, XGBoost, Prophet, SHAP

- Architected an enterprise AI business intelligence platform integrating **Python**, **FastAPI**, **React**, and **PostgreSQL** for executive analytics, KPI monitoring, and interactive dashboard exploration.
- Implemented **MLflow-based model tracking**, **XGBoost churn prediction**, **Prophet forecasting**, and **SHAP explainability** to support data-driven decision-making and transparent model insights.
- Developed a split frontend-backend deployment with **React** and **FastAPI**, enabling real-time analytics, forecasting dashboards, and modular API-driven BI workflows.

Sentinel AI – Enterprise Data Quality & Autonomous Observability Platform

[GitHub](#) | [Live Demo](#)

Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, Groq Llama 3, Docker

- Developed an AI-powered platform to profile datasets, identify missing values, duplicate records, inconsistent formats, and other data quality issues before analysis.
- Built automated data validation workflows that generated quality reports and detected anomalies, improving the reliability of datasets used for analytics and machine learning.
- Integrated Groq Llama 3 to generate natural language explanations for data quality issues and recommend data cleaning steps through a FastAPI backend.

TECHNICAL SKILLS

Programming: Python, SQL, C++, JavaScript

Data Science: Pandas, NumPy, Scikit-learn, XGBoost, Prophet, SHAP, MLflow, Power BI

Development: FastAPI, React, Next.js, Node.js, Express.js, REST APIs, PostgreSQL, MySQL, MongoDB, DuckDB

Tools: Git, GitHub, Docker, Linux, Jupyter Notebook

Core CS: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS & CERTIFICATIONS

- Certified in Google AI Essentials – Google (Coursera) (June 2026). [Certificate](#)
- Certified in Basics of Data Analytics – Physics Wallah Microsoft (April 2026). [Certificate](#)
- Certified in Microsoft Azure Essentials Professional Certificate – Microsoft & LinkedIn (May 2026). [Certificate](#)
- Completed Deloitte Data Analytics Job Simulation – Forage (May 2026). [Certificate](#)
